

# Stay Safe with Meliá

## APPLICABLE RATES FOR CASES OF COVID-19

1

DETECTION

In the event that a guest tests positive for Covid-19, they will be transferred to a quarantine area designated by the hotel.

### FAMILY WITH A POSITIVE MEMBER

Should other family members test negative, they will be able to stay in their original room. Only the guest who has tested positive will be transferred to the quarantine area.

2

FAMILY

### FAMILY IN A QUARANTINE AREA

Should any family member or partner wish to stay with the person who has tested positive in the quarantine area, and as long as it is authorized by accredited medical personnel, the hotel may accept; however, the guest will have to sign a release. Guests who have tested positive will not be able to receive visits due to the high risk of contagion that this could pose to other guests.

### EXTENDED STAY FOR RELATIVES

Should the rest of the family or a companion wish to extend their stay to wait for their relative to recover, the special rate may also be granted for the extension of their stay once their original booking ends.

3
